

SHOWER PLATFORM

The PVI Shower Platform is the latest addition to Prairie View Industries' line of quality accessibility products. Knowing that all shower stalls are different sizes, PVI will build your custom platform within days of your order. Easily adjustable legs allow your platform to be raised or lowered to the height of your shower threshold and when used with a PVI threshold ramp to enter your shower, you will have an economic solution to raise shower floors to accommodate wheelchairs. Like all Prairie View access products this platform is made of light weight aluminum and has a 400 pound load capacity.

Shower Platform

Width:	Built to your specifications
Length:	Built to your specifications
Load Capacity:	400 pounds on two axles
Weight:	42 pounds
Floor:	Slip resistant grooved aluminum, surfaced with anti-slip, high traction safety tape.
